**Request for Corrected Filing Receipt**

Commissioner for Patents  
P.O. Box 1460  
Alexandria, VA 2231301450

Sir:

1. Attached is a copy of an official filing receipt received from the U.S. Patent and Trademark Office for which a corrected filing receipt is respectfully requested.
2. There is an error in the title, which was incorrectly entered. The title should read - Plug-and-Play Cable with Protocol Translation --. Enclosed is a copy of the first page of the Application as filed on August 18, 2000, showing the correct title. Also enclosed is a redlined copy of the Filing Receipt showing the requested change.

Respectfully submitted,  
Perkins Coie LLP

Date: October 5, 2004

## FILING RECEIPT

\*OC000000005460443\*

Date Mailed: 10/10/2000

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the PTO processes the reply to the Notice, the PTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

**LICENSE FOR FOREIGN FILING UNDER  
Title 35, United States Code, Section 184  
Title 37, Code of Federal Regulations, 5.11 & 5.15**

**GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 36 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

**PLEASE NOTE the following information about the Filing Receipt:**

- The articles such as "a," "an" and "the" are not included as the first words in the title of an application. They are considered to be unnecessary to the understanding of the title.
- The words "new," "improved," "improvements in" or "relating to" are not included as first words in the title of an application because a patent application, by nature, is a new idea or improvement.
- The title may be truncated if it consists of more than 600 characters (letters and spaces combined).
- The docket number allows a maximum of 25 characters.
- If your application was submitted under 37 CFR 1.10, your filing date should be the "date in" found on the Express Mail label. If there is a discrepancy, you should submit a request for a corrected Filing Receipt along with a copy of the Express Mail label showing the "date in."
- The title is recorded in sentence case.

Any corrections that may need to be done to your Filing Receipt should be directed to:

Plug-And-Play Data Cable With Protocol Translation

by

Michael Rostoker and Joel Silverman

5

Description

Cross Reference to Related Applications

This application is related to U.S. Patent Application Serial No. \_\_\_\_\_, (Atty. Docket No. KLSIP002), filed November 14, 1997 on behalf of inventors Michael Aronson and Joel Silverman, entitled "Method and Apparatus for Digital Protocol Translation", which is incorporated herein by reference for all purposes.

Technical Field

This invention relates generally to data cables, and more particularly to "smart" data cables which include data translation circuitry.

Background Art

There is often a need or a desire to permit the digital electronic communication between two or more digital electronic apparatus. For example, it is often desirable to have a personal computer interfaced with a local area network (LAN). To implement the digital electronic communication between the computer and the network, various communication protocols have been developed. For example, Ethernet is a common communication protocol used in many local area networks.

In practice, in order to network a personal computer, a network card is installed in the computer. Often, the network card includes an Ethernet port. A cable assembly, typically including Ethernet connectors at both ends, can be used to connect the Ethernet port of the network card into the network system.

A problem can sometimes arise when two or more apparatus are configured to communicate with different communication protocols. For example, laptop computers are not often provided with Ethernet cards, and therefore cannot directly communicate with Ethernet networks or other apparatus communicating using
